

iWellness Exam

At **Advanced Eye Care** your eye health is our primary concern. Our goal is to diagnose eye health problems as early as possible, long before they become a serious issue. In the early stages, many eye diseases lie below the surface of the retina and are not visible during a traditional eye exam.

Now, utilizing breakthrough technology called the *iWellness Exam*, we are able to look below the surface of the retina and detect eye diseases earlier than ever. The *iWellness Exam* is similar to an MRI of the eye yet it is safe, painless and only takes a few seconds.

Dr. Powers recommends the *iWellness Exam* be performed annually on all patients age **10** and older, but it is especially important if you have a history of frequent headaches, floaters or a high prescription. It is also valuable in detecting early retinal changes from diabetes, hypertension, glaucoma and macular degeneration.

Because vision and medical insurances do not cover advanced diagnostic screening procedures such as *iWellness Exam*, there is an out of pocket expense of **\$39**.

Please choose below:

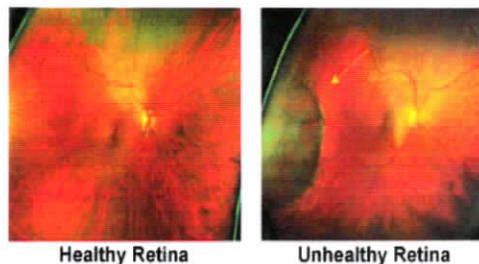

YES- **I DO** want the *iWellness Exam* today and understand there will be a **\$39 charge**.

NO- **I DO NOT** want the *iWellness Exam* today.

If you have any questions or concerns regarding the *iWellness Exam* you may leave this blank and discuss it with your optometric technician or Dr. Powers.
